EXPERIENCE

VERSATILO GROUP | JUNIOR FULLSTACK ENGINEER

February 2026 – Current | Gulshan 2, Dhaka

- Contributed to the full-stack development of an OTA web application using NestJS, React, and TypeScript.
- Developed and maintained the Cargo module to manage cargo service operations.
- Implemented asynchronous background processing with RabbitMQ to handle jobs efficiently and improve system responsiveness.
- Collaborated on API design, database performance optimization, and production feature deployment.

DEEP MINDS LAB AI | AI/ML ENGINEER INTERN

December 2025 – January 2026 | Uttara 12, Dhaka

- Developed a real-time automated egg counting & classification system (brown vs. white eggs) from live camera video streams for poultry industry use.
- Led R&D for yellow belt conveyor scenario; designed classical computer vision pipeline using distance transform + watershed segmentation, achieving ~99% accuracy without deep learning.
- Built and evaluated YOLOv8-based deep learning pipeline for performance benchmarking, robustness testing, and production-readiness comparison.

COMPETITIVE PROGRAMMING

- **Codeforces** : Solved 800+ problems, rating 1160+.
- **LeetCode** , **CSes** , **GeeksforGeeks** , **AtCoder** : Solved 300+ problems.

PROJECTS

SOCIAL SPHERE | REACT.JS, NODE.JS, EXPRESS.JS, WEBSOCKET, SUPABASE(PGSQL),

SENDGRID, AZURE

Code 

- Implemented authentication and role-based authorization, integrated SendGrid for email verification, built real-time chat using WebSocket, and added automated content moderation with Azure Content Safety and Vision APIs.
- Deployed the backend to an Azure VM and the frontend to Azure Static Web Apps.

BOOK WEB | C#, ASP.NET, ENTITY FRAMEWORK, PGSQL, BOOTSTRAP WATCH(THEME)

Code 

- Developed a full-stack e-commerce web application for book management using modern .NET technologies and clean architecture principles.
- Implemented a multi-layered architecture with clear separation of concerns, applying industry-standard design patterns such as the Repository Pattern and Unit of Work.

EMAIL CLASSIFIER | PYTHON, NUMPY, PANDAS, SCIKIT-LEARN, STREAMLIT, JUPYTER NOTEBOOK

Code 

- Trained and validated ML models on a Kaggle dataset for spam/ham classification and built a Streamlit demo to evaluate.
